

Prototypical Disabled Accessible Chemistry Workstation National Endowment for the Arts: Universal Design Exemplar

Enlarged Details of Controls

1 The fully integrated work top set into a fume hood adjusts at the touch of a button. Hydraulic legs raise and lower the work top in seconds.

2 Adjustable chemical drain connecting to cup-sink extends and contracts with work top, allowing for continued use at all heights.

3 The integral air baffle moves with the work top, continuing to provide equal control airflow for protection

4 Controls are color and texture coordinated and assigned braille tags. Danger is communicated through sound, color, and touch.

5 Sliding glass shield slides with adjustable work top to ensure all users visibility with protection.

Adjustable Height Work Top

37" Max. Work Top Height Above Finished Floor

27" Min. Work Top Height Above Finished Floor
